Introduction

MiadEiffel Road & Construction Company (MECC) is an Afghan Company established in 2004 in Kabul.

MiadEiffel Road & Construction Company (MECC) is member and registered with:

- ◆ Afghanistan Investment Support Agency(AISA) by license No D-25751.
- ◆ Ministry of Urban Development (MOUD) by license No {(120/117) (1391/03/15)}.
- ◆ Member of Afghanistan Builders Association (ABA) by Certification No {(OMP-45) (255)}.
- ◆ DUNS No: 850517758, CAGE/NCAGE No: SRM90, NAICS CODE: 236220, JCCS ID: 70154

The company has both Afghan and international management, who have travelled the world working for either their respective governments or for multi-national companies. Our company's management has been in Afghanistan for over 9 years and are very well acquainted with the intricacies of doing business in this country. In addition, our management and staff are fully up to date on the present security situation all over Afghanistan.

Since 2004, we have gained tremendous experience assisting international clients to implement their construction projects in Afghanistan. This experience has allowed us to build the capacity of our Afghan Engineers, Designers, Tradesmen and new university graduates, while at the same time satisfying our clients with high quality finished products.

We import materials from world-famous first quality suppliers in order to ensure that quality is maintained at its premium level. MECC has the supply chain expertise to ensure your organisation receives the most competitive pricing and seamless procurement transactions, from point of origin to final destination; by land, sea or air. To ensure our clients receive the best possible service, our procurement specialists closely monitor local, regional and global markets to ensure the finest quality, at the most competitive prices. The local and regional logistical contacts that we have nurtured while doing business in Afghanistan since 2004 ensures the goods arrive at their final destination with minimum delays.

At MECC, we believe in quick service with an aim towards establishing and maintaining long lasting business relationships with a maximum level of customer satisfaction.

Our Main office is located in Qala e Fathullah, Street#03, House #88, Kabul Afghanistan
Our sub offices are located in Mazar Sharif, Herat and Logar Provinces.

Our Mission:

MECC aims to provide its clients with the highest standards of services via its qualified and professional employees, whilst at the same time controlling expenditures without affecting quality or quantity, thereby ensuring projects are completed on time, within budget and to the satisfaction of our client.

MECC Vision:

Our vision is to become the leading and most professional and reliable company to provide highest quality construction in Afghanistan.

Construction (Vertical Structures):

In Afghanistan MECC has built new facilities and has renovated and updated existing construction for a variety of military and civilian agencies, including the Afghan National Army and Police, border control authorities, and local governments. MECC projects make lasting improvements to the physical infrastructure while also contributing to improved governance and rule of law in the new Afghanistan.

Our Capabilities:

Construction (Horizontal Structures):

MECC offers its clients our vast expertise in building roads, bridges, parking areas, helipads, and aircraft taxiways and aprons. MECC can enclose and protect building sites of all sizes with walls, fences, and entry-control points. Our engineers also design and install water and electrical power distribution systems and wastewater treatment plants.

- Green Field Works (Football Play Ground) MECC is one of the FIFA and Green Field aprovel Company in Afghanistan.
- Asphalt Paving
- Grading
- Grinding and milling
- Stone Work
- Asphalt Dump Sites

MECC has vast experience in all types of road construction and paving work, including streets, interstate highways and toll ways. Projects include commercial parking facilities, subdivisions, developments and residential streets, shopping malls; strip malls property maintenance programs, industrial roads and drives.

We are involved! Our project managers oversee all aspects of the project from start to finish. They are the liaisons between MECC and our customers to make sure that the project is completed timely, efficiently, and professionally. Quality and service are their top priorities.

Material Field Testing

MECC have expertise to test construction materials and finished products on location to determine their quality and suitability for the intended use.

MECC's trained staffs conduct materials tests using the latest specifications and testing equipment. Among the products we test are concrete, concrete blocks (CMU), steel and other metals, asphalt, and electrical panel boxes and wiring systems.

MECC's quality-control officers work with engineering and construction staff throughout the project execution to ensure that materials and products used meet all required specifications.

One Civil Consultants

CIVIL

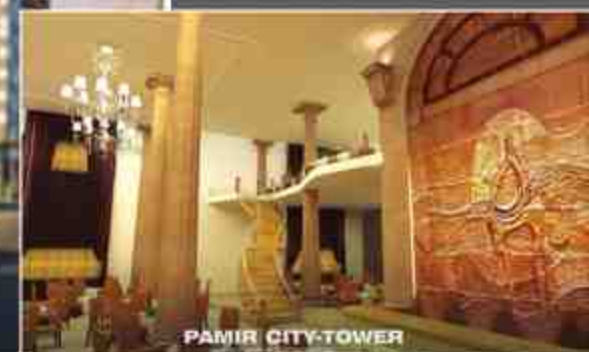

Preface

One Civil Consultants (OCC) was formed in Kabul on 2010 and registered with Afghanistan Investment Support Agency (AISA) by license No (D-35012). Its field of activity covers Engineering areas such as Architectural, Civil, Roads, Structures, HVAC and Industrial Projects as well.

OCC enjoys the services of well-experienced employees who have been active in projects of different fields in Afghanistan and abroad. The best utilization of these abilities is our endeavor.

OCC consists of specialist department each addressing a particular field of technology. Each OCC department calls on the latest scientific and technological developments which have been gained from considerable experience. All projects in OCC will be implemented focusing on Quality of work, Optimization of project cost, and Safety at work, Integrity with Environmental conditions and Creativity.

OCC offers a variety of services including: feasibility studies, conceptual design, basic and detail engineering and design, preparation of construction drawings, construction supervision and all related engineering and technical services in the fields covered by various Departments of the Company.

Fields of Specialization Architecture:

Buildings, such as Hotels, Housing, Tourist facilities, Hospitals, Commercial buildings, Offices, Schools & Universities, Recreational Facilities, Sport Centers, etc.

Contact: +93(0)700 235 581

E-mail: onecivil.construction@gmail.com

Address: House# 88, Street# 03, Qala e Fathullah-Taimani, Kabul-Afghanistan

Civil & Structure:

Industrial Buildings, Bridges, Heavy Equipment Foundations, Special Structures, Heavy Steel & Concrete Structures, Cement Factories Structures, Power Plant Structures, Chimneys, Cooling Tower, Steel & Concrete Silos, Civil design of Plants & Factories, Land Preparation, Landscaping, Surface water systems, Pavement, etc

Road & Transportation:

Roads and Motorways, Urban Transport Planning & Traffic Studies, Port Infrastructures.

Heating, Ventilation & Air Conditioning (HVAC):

All Electrical & Mechanical Utilities for Buildings and Industries, including, Heating and Ventilation Systems, Water & Waste Water Treatment Systems, Air Conditioning Systems, etc.

Electrical Facilities such as Lighting Systems, CCTV Systems, Telephone and Paging Systems, Computer Networks, etc

Team for Risk Management (T4 RMC)

TEAM4 RMC:

Team for Risk Management Consultancy (TEAM4RMC) is a nongovernmental and non-political security and risk management company established by qualified and competent Afghans. The organization is being run by highly professional, experienced and talented National and International personnel who have been providing risk and security management services to United Nation, Private Companies, Development Projects, United State Department of Defense DOD, healthcare zttfacilities, telecom operators, educational facilities, government, hotels and commercial projects in Afghanistan. The employees of Team 4 RMC have twenty years of security experience in Afghanistan

TEAM4RMC has strategic teaming partnership with several international security companies that have good experience and history in provision of quality services in the world.

Following are our partners:

• **COCHISE MST** – United State based Security Company provides security and risk management services in several high risk countries. Cochise MTS, Inc. (Cochise) was established in 1996 by founder, CEO and President Colonel Jesse L. Johnson, (Retd). Cochise has performed special training missions to the Royal Saudi Airborne Ranger and Special Forces School and Brigade in Tabuk, Kingdom of Saudi Arabia. Cochise conducted special security missions in Iraq under the direction of the US Army Corps of Engineers. The Cochise Organization currently has offices in Kuwait, Afghanistan, Kuwait, Iraq and Beirut. His experience and knowledge of the Middle East Region's culture, military organizations, and methods of operating has been an invaluable asset to his activities.

E-mail: info@team4rmc.com

Website: www.team4rmc.com

Address: House# 88, Street# 03, Qala e Fathullah-Taimani, Kabul-Afghanistan

Our Mission:

The core objectives of TEAM4 RMC is to take active part in rebuilding Afghanistan through provision of safe and secure environment for those who are seeking to restore peace, stability and to help Afghans in reconstructing their country. As such, the leadership of the company is determined to fully participate in implementing and achieving the Afghanistan Millennium Development Goals (MDGS) as well as the Afghanistan National Development Strategy (ANDS) in collaboration with the Afghan government and international community. The leadership of the company is further committed in assisting the Afghan government and Afghan community in managing risk and providing job opportunity in Afghanistan particularly in remote areas. The Organization pays profound importance to implement projects aiming to improve stability and cross-cultural relations, so that more traditional forms of development assistance can be resumed.

Also, the company aims to promote employment opportunities in urban and rural areas for the skilled and unskilled local inhabitants. The company provides a safer and progressive work environment to the staff members allowing them to grow professionally and achieve financial success for themselves and their families. TM4RMC encourages its employees to take initiative, be creative, and take ownership of their projects so as to provide consistent and fruitful results.

TEAM4RMC offers an extensive Security and Risk Management services. The company was formed to assist and overcome the significant weakness and inadequacies of the Afghan Government Security Services they provide to clients

OUR SERVICES:

TEAM4 RMC provides security and risk management consultancy to its national and international clients in the designated areas which include residential/commercial facilities, personal protection for high profile, high risk individuals, and security consulting and training services. Success of the team is the result of years of practical experience, untiring duties, professionalism, commitment and understanding in the field of safety and security.

Address: Arya City, Opposite of Kabul International Airport, Kabul-Afghanistan.

The Concept of 3 in 1 Model

The revolution in Science and Technology has transformed the world into a global village in which Afghanistan has already established its nexus. Life in the global village is highly modernized but extremely busy where people must work hard in order to be part of it. Among other things, the parents often do not have time to help their kids in their homework, assignment, debates and presentation. They usually hire home-based teachers or send them to Mosque for additional learning that confuse students as the environment of school is more disciplined, organized and systematic while teach methods by home based teacher or in Masjid might be deferent. Academic assessment suggests that learning in three different environments (School, home based teacher and Mosque) have negatively resulted on the learning abilities of students. It is not possible for school student to adjust with 3 deferent methods, environments and behaviors. The 3 in 1 teaching model developed by Arya City School will tremendously resolve the learning aspects.

Arya City School designed a program for implementation of 3 in 1 model as follows:

Student Classes begins from: 7:30hrs to 13:00hrs.

Student lunch and Prayer time: 1300hrs to 14:00hrs.

Student homework, assignment, debate, and presentation: 14:00hrs to 15:30hrs

Student group discussions, Sports, Social Activities: 15:30 to 16:30-hrs

Since all school related work of students will be performed in the school, students will not require carrying their school bags to their home if they wish.

Safi International Education Organization

Introduction

Education is a better safeguarding of liberty than a standing army. *The management of Safi International Education Organization strongly believes that the best way to help Afghans in restoration of a sustainable peace and stability in Afghanistan is to educate and to build the capacity of Afghans.*

Safi International Education Organization, headquartered in Kabul and regional office in Mazar City- Afghanistan, is an industry leader in Education and Training industry. The Organisation is registered with Ministry of Education, AISA and with Ministry of Labour and Social Affair. We are interested to take active part in rebuilding Afghanistan through provision of standard, quality and professional education and training for the Afghans. As such, the leadership of the company is determined to fully participate in implementing and achieving the Afghanistan Millennium Development Goals (MDGS) as well as the Afghanistan National Development Strategy (ANDS) in collaboration with the Afghan government and international community.

The leadership of the company is further committed in assisting the Afghanistan Education Ministry and Afghan community in building capacity through training Afghans and providing job opportunity in Afghanistan. The Organization pays profound importance to implement projects aiming to improve stability and cross-cultural relations through educating Afghans, so that more traditional forms of development assistance can be resumed.

Safi International Education Organization maintains the highest standards and prides itself as being a partner you can trust. This organisation in a short time of its establishment was able to have considerable achievement. We succeeded to training 67 staff members of Asia Bridge Logistic Solution and Kabul Balkh Safety and Security Organisation. Safi Education Organisation Succeed to open a school for 800 students in Mazar City. Few mores are under registration process. Safi International Education Organisation had also submitted a proposal on street working children to the embassy of Sweden which is under consideration

The management of Safi International Education Organization respects gender equity and believe that without considering gender balance, an organization can't be successful. Hence the deputy of this organization is an educated and experience

Class Environment

Keeping the seniority of the trainees in focus, we shall conduct the class environment in entirely professional way. However, to make sure everyone get involved in class activities we shall try to bring live in the classes. We shall encourage the trainees to feel free to take part actively in the entire process of this training program. In sum up, the class environment would friendly and professional.

Quality Control

Safi International Education Organization shall appoint one supervisor and sufficient number of trainers for this project.

The project supervisor shall be responsible for the conduct, implementation, monitoring and evaluation of the entire training program. S/he will conduct assessment and evaluation checks on regular basis to make sure the implementation of the program runs smoothly and professionally. He will make sure the trainees and participants are progressing and improving according to the plan of the training program. S/he will be in direct contact with ACME Chief of Party or Program Management Team.

Safi International Education Organization shall provide all teaching materials, text books, stationary and equipment required throughout the implementation of this training program, and shall be provide transportation for all of its trainers and staff related to this program.

We shall provide monthly narrative, financial and evaluation reports during the implementation of the program. The participants on satisfactory completion of each level or completion of the whole program would be provided certificates. We shall put every effort into full swing to make this program a success. Thus, we really are very open in accepting criticism, feedbacks and suggestions to make sure the participants and the clients are satisfied.
